

ENGINEERING INTERN(S)

The Water Replenishment District of Southern California (WRD or District) is seeking a motivated intern(s) for our Engineering and Operations Departments. The intern(s) will have the opportunity to gain real-world experience supporting various engineering projects and operations of the District's water treatment facilities. Under supervision, this position will involve working with professional engineers, the Water Operations Superintendent, and project managers on engineering design and construction projects, contract management, etc.

POSITION SUMMARY:

This multifaceted position will span a variety of activities and therefore require the incumbent to be highly motivated and exercise flexibility as he/she performs various tasks related to the execution and operations of District projects and treatment plants. The ideal candidate must be enrolled as a full-time student at an accredited college/university, with a minimum of two years completed, and be capable of working 15-20 hours per week.

QUALIFICATIONS:

Candidate must have basic knowledge of scientific and engineering principles via a minimum of two years of undergraduate study in Civil, Environmental, or Chemical Engineering, Environmental Science or equivalent; the ability to apply a reasonable level of technical and mechanical aptitude; perform duties in a timely manner with minimal supervision once trained; excellent written, verbal and organizational skills; and working knowledge of basic computing, spreadsheets, word processing, and presentations via the Microsoft Office platform. Experience with statistical methods and the principles of water/wastewater treatment is a plus. The incumbent must be flexible to work in multiple settings, including office and outdoor areas such as the District's treatment facilities. Assignments may include, but are not limited to:

- Collect, analyze, and interpret data (operational, statistical, etc.) and provide recommendations and/or engineering solutions.
- Prepare and/or review plans, specifications, bidding documents, contracts, environmental documents, correspondence, requests for proposals, requests for qualifications, presentations, spreadsheets, and other technical documents.
- Support the management of projects, studies, and programs, including tracking project budgets and schedules, filing, reviewing contracts and reports, in coordination with other District departments, contractors, consultants, and other agencies.
- Assist with development of planning, designing, permitting, and asset management for treatment plant operations.
- Research laws, regulations, policies, and design standards.
- Attend project meetings and participate in District events.

The District's internship program is designed to provide an opportunity for college students to gain real-world experience while applying the principals and practices obtained through their academic training. Incumbents must furnish proof of enrollment and class schedule each semester/quarter to remain in the program. The applicant must meet the following program requirement for consideration: 1. must have at least one year remaining in school; 2. must be currently enrolled full-time in an accredited program related to the aforementioned fields.

COMPENSATION: \$13 – \$15 per hour (depending on experience)

HOW TO APPLY:

Interested candidates can apply by downloading and completing an application available on the District website at <http://www.wrd.org/content/careers-0>. Please submit a cover letter and resume with your application. **No candidate will be considered without submission of a cover letter, resume, and a fully completed and signed employment application.**

APPLICATION DEADLINE IS 5 P.M. FRIDAY, FEBRUARY 16, 2018.

Completed application, cover letter, and resume may be submitted as follows:
