Summary of Pertinent Data

Item	Administrative Year 2022 - 2023	Administrative Year 2023- 2024
Parties	151	151
Rights Holders	122	120
Active pumpers	65	60
Active non-parties	0	0
Allowed pumping allocation (acre-feet)	217,367	217,367
Water put into Storage (acre-feet) ¹	31,965.93	38,041.22
Mean Precipitation (inches)	25.55	23.29
Injection at the Alamitos Barrier project (acre-feet) ²	4,024	3,929
Spreading operations (acre-feet) ³	224,043	198,259
Watermaster Budget, total ⁴	\$316,500	\$290,695
Exported water use (acre-feet) ⁵	1,590	1,950
APA Extractions (acre-feet) ⁶	143,206.35	129,114.21
Storage Production (acre-feet)	18,550.05	26,466.84
Recycled water use by entities (acre-feet)	14,247	13,399
Imported water use by entities (acre-feet) ⁷	99,735	99,902
Total Water Use by Parties (acre-feet)	275,738	268,882

¹ Includes carryover conversion corrections of 1,644.24 af (Table 2).

² Only includes injection from the Los Angeles County portion of the Alamitos Barrier.

³ Provisional information from the Los Angeles County Department of Public Works (includes advanced treated water).

⁴ For 2023-2024 AY, Water Rights Panel assessment was \$32,605 Administrative Body assessment was \$258,090.

⁵ Cal American Water Company exported groundwater to its service area that overlies the West Coast Basin.

⁶ Excludes extractions by parties with non-consumptive water use permits and by non-parties.

⁷ Includes groundwater imported from the San Gabriel Basin.

Introduction

Executive Summary

This 2023-2024 Watermaster Report, developed by the Administrative Body and adopted by the Water Rights Panel, provides information on groundwater extractions, storage accounts, use of imported water and recycled water, replenishment operations, and the budget and finances of the Central Basin (Basin) Watermaster during the 2023-2024 administrative year (AY). This report complies with the provisions set forth in the Central Basin Third Amended Judgment (Judgment).

During the 2023-2024 AY, the Basin experienced a decrease in groundwater extractions (assessed production and storage production) in comparison to the previous AY. Furthermore, no imported water was purchased by the Water Replenishment District of Southern California (WRD) for spreading in the Montebello Forebay.

This report is organized into three sections, including Water Use, Water Supply, and Watermaster Costs and Budget. In addition, the report provides various tables and figures describing the narrated information.

Background

The Central Basin Watermaster Service Area overlies approximately 227 square miles of the Basin in southeastern Los Angeles County. Figure 1 shows the location and boundaries of the Central Basin Watermaster Service Area (adjudicated boundary). The Watermaster Service Area is bounded by the Newport-Inglewood Uplift on the southwest, the Los Angeles-Orange County line on the southeast, and an irregular line that approximately follows Stocker Street, Martin Luther King Boulevard, Alameda Street, Olympic Boulevard, the boundary between the City of Los Angeles and unincorporated East Los Angeles, and the foot of the Merced Hills and Puente Hills on the north. Twenty-three incorporated cities and several unincorporated communities lie within the Watermaster Service Area. Groundwater from the Basin provides a substantial portion of the water supply needed by the residents, businesses, and industries in the area overlying the Basin.

More than 60 years ago, groundwater overdraft and declining water levels in the Basin threatened the area's groundwater supply and caused the intrusion of seawater into the aquifers in the southern part of the Basin. However, timely legal action and adjudication of the water rights halted the overdraft and prevented further damage to the Basin. Since that time, groundwater extraction from the Basin is limited to the amounts set by a Superior Court Judgment and monitored by a Court-appointed Watermaster.

The first Judgment was finalized and signed in 1965, and it appointed the Department of Water Resources (DWR) as the Watermaster. Since its inception, the Judgment has been amended three times. The Judgment was first amended in 1980 to provide transition from an administrative year

to a water year (October 1 to September 30) to fiscal year (July 1 to June 30). The Judgment was amended for the second time in 1985 to modify the annual budget (\$20 minimum assessment) and exchange pool provisions. In addition, the second amendment modified carryover and overproduction provisions, defined carryover, and provided for exemptions for extractors of contaminated groundwater. The Third Amended Judgment was finalized on December 23, 2013. For the first time, the Court allowed Parties to have direct input into how the Judgment is administered and enforced. The Judgment confirmed the retirement of DWR as the Watermaster and created three separate bodies that assist the Court in the administration and enforcement of the provisions of the Judgment.

The first body is the Administrative Body, which administers the Watermaster accounting and reporting functions. The WRD was appointed by the Court to fulfill this role.

The second body is the Water Rights Panel, which enforces issues related to the pumping rights within the adjudication. The Water Rights Panel is made up of seven water rights holders who are elected by rights holders in the Central Basin. Members of the Water Rights Panel during the 2023-2024 AY included the Bellflower-Somerset Mutual Water Company, City of Downey, Golden State Water Company, City of Lakewood, City of Long Beach, City of Paramount, and City of Signal Hill.

The third body is the Storage Panel, which is comprised of the Water Rights Panel and the WRD Board of Directors; together they review and approve certain groundwater storage efforts.

Water Use

A. Allowed Pumping Allocation Extractions by Parties

The Judgment limits the amount of groundwater each Party to the Judgment may extract annually from the Basin. This amount is known as the Party's Allowed Pumping Allocation, or "APA". The APA for each Party is listed in Table 1a. Parties are required to report groundwater extractions to the Administrative Body monthly (or quarterly for smaller producers). In addition, Table 1b lists the total drought carryover rights for the parties that hold them. Appendix A lists, by Party, the volume of groundwater extracted monthly from each active well in the Basin. Figure 1 describes the variation of groundwater production by three distinct production classifications: less than 500 acre-feet per year (afy), 500 to 2,000 afy, and more than 2,000 afy, during the 2023-2024 AY. In addition, Figure 2 illustrates the monthly water production (excluding non-consumptive use) for the 2023-2024 AY, which totaled 155,581.05 af (includes 26,466.84 af of storage production), which is a 4% production decrease from the previous AY.

To provide flexibility regarding groundwater extractions, the Judgment contains provisions, such as the "One-Year Carryover", which allows each Party to carryover into the succeeding administrative year a portion of its unused APA. Specifically, Parties are allowed to carryover unused rights up to the greater of:

- 60% of their APA plus (+) or minus (-) any leases with flex or 20 af, whichever is more, less the amount of water in a Party's storage account; or
- 20% of a Party's APA

This type of provision is necessary to meet unforeseen water demand. In addition, any unused Exchange Pool water, discussed in Section (I), is carried over into the following AY.

B. Storage Transactions

The Judgment allows Parties with water rights to store water in the Basin for later extraction. In 2022-2023 AY, an updated interpretation of the carryover conversion to storage provision went into effect. Specifically, the carryover conversion changed from allowing only one-year carryover to be converted into storage to both one-year and current AY carryover. Furthermore, parties are required to pay the Replenishment Assessment to WRD for all carryover conversion to storage.

On May 12, 2022, the Water Rights Panel reviewed and approved the updated interpretation of carryover conversion. Subsequently, the Administrative Body approved an update to their rules to reflect the new interpretation. The updated interpretation references, Section III.A.(2) of the Judgment states that a party having carryover may elect to convert all or part into stored water. Therefore, parties may convert one-year carryover and current AY carryover into storage. This process allows parties to put more water into storage in any given year. Current AY carryover is

defined as water rights that will not be extracted or leased out prior to the end of the current AY. To convert current AY carryover, parties must exhaust their one-year carryover balance and then may choose to convert current AY carryover. Any carryover conversion is subject to storage capacity limits in accordance with the Judgment. Table 2 describes storage accounting including total carryover from the 2022-2023 AY and storage activity for the 2023-2024 AY.

In addition, there were three carryover correction agreements implemented during the 2022-2023 AY. Specifically, there was a carryover conversion calculation error identified in 2021-2022 AY. The calculation error resulted in carryover to be less than it should have been into the ensuing AY. The error impacted specific parties that withdrew from storage between the 2013-2014 to 2018-2019 AY. The agreements for each party state that they will be credited specific storage amounts for five (5) years followed by paid annual installments (2022-2023 AY to 2026-2027 AY). The following parties will be credited as such: City of Downey: 670.00 af, City of Lakewood: 794.34 af, and City of Long Beach: 179.90 af. Table 3 lists the quantity of water that was put into storage by each Party during the 2023-2024 AY. The overall total of water that was put into storage was 38,041.22 af including the carryover corrections, which is a 19% increase from the previous AY.

In 2023-2024 AY a total of 26,466.84 af was extracted from storage by five Parties, the details are in Table 4. The Judgment allows for the transfer of stored water between Parties. There were no transfers of stored water (Table 5).

Table 6 provides a historical storage summary from 2013-2014 to 2023-2024 AY of water put into and extracted from storage, storage balance, and the available adjudicated storage capacity.

C. Regional Disadvantaged Communities Incentive Program

Section II.H. of the Judgment contains provisions for the development of a Regional Disadvantaged Communities Incentive Program (RDCIP) that allocates 23,000 af of storage space for the use or benefit of Disadvantaged Communities (DAC) within the Central Basin. A DAC is defined as any area that is served by a water purveyor and consisting of one or more contiguous census tracts, which based upon the most recent U.S. Census data, demonstrates a median household income which is less than eighty percent (80%) of the median household income for all Census Tracts within the State of California. This program was developed by the Water Rights Panel during the 2014-2015 AY and approved by the Court in June 2015.

There were no requests for participation in the RDCIP in the 2023-2024 AY.

D. Total Extraction Right and Over-extraction

The total extraction right is the maximum amount of groundwater that can be extracted in a single AY. In the Central Basin, Parties with carryover and/or storage rights are allowed to extract up to 140% of the sum of their APA plus or minus (+/-) leased water rights.

For example, if a Party has an APA of 1,000 af, 400 af of stored water rights, and leased in an additional 200 af, their total extraction right would be calculated as follows: $(1,000 + 200) \times 1.4 = 1,680$ af. Conversely, if the Party leased out 200 af, their total extraction right would be $(1,000 -$

200) X 1.4 = 1,120 af. Parties with no carryover and/or storage rights may over-extract 20% of their APA plus or minus (+/-) leased water or 20 af, whichever is greater.

Under certain circumstances, a Party may extract in a greater amount if they receive prior approval from Watermaster. Any Party that exceeds their total extraction right without prior approval from Watermaster is in violation of the Judgment.

Any over-extraction, which is the difference between total rights and total extractions, is deducted from that Party's subsequent administrative year's APA. The over-extraction must be reconciled in the following administrative year unless Watermaster concludes that making up the over-extraction would create an unreasonable hardship for the Party. In such cases, Watermaster may prorate the reduction in the Party's APA over a period of up to five years. The Watermaster will notify a Party when they are in violation of the Judgment and/or over-extract.

During the 2023-2024 AY, there were three parties with over-extractions, two of three were in violation of the Judgment. The Newark group had an over-extraction of 2.66, but did not pump beyond their maximum allowable extraction, therefore were not in violation of the Judgment. City of Lakewood and Caltrans were in violation of the Judgment. The City of Lakewood had an over-extraction of 1,211.49 and reports that the over-extraction was inadvertent related to a misunderstanding of its total production rights compared to its total available rights for the administrative year. The provision has been clarified with the City. Caltrans has had a significant over-extraction carryover from previous years, which is a result from dewatering under the 105 Freeway (Table 7).

E. Extractions by Non-Parties

There were no reported extractions by Non-Parties this AY (Table 8).

F. Extractions of Contaminated Groundwater

A Party that is a water rights holder may petition WRD for a Non-Consumptive Water Use Permit (NCWUP) as part of a project to remediate or ameliorate groundwater contamination. If the petition is granted, the Party may extract the groundwater without counting against its production rights, so long as the conditions of the Judgment are met. A non-Party may extract contaminated groundwater for cleanup purposes by partnering with a Party who obtains the NCWUP and then assigns it to the non-Party.

Table 9 lists current NCWUPs issued by WRD, and the amounts of groundwater extracted under those permits. In the 2023-2024 AY there were 301.78 af of NCWUP extractions via seven permits. Appendix A reports these extractions monthly by well.

G. Allowed Pumping Allocation Transfers

Each year, APAs are transferred between Parties through leases (temporary transfers) and sales (permanent transfers) transactions. Table 10 shows transfers of APAs through leases, specifically the parties involved, transaction type, amount, and recordation date. During the 2023-2024 AY

there were 41 leases that transferred 20,122.10 af (33 leases with flex and 8 leases without flex). Leases with flex transfer both the pumping right and associated carryover rights to the lessee for the term stated within the lease agreement.

In transferring water rights, Parties must specify (1) the type of right (i.e., APA, one-year carryover, or drought carryover), (2) the amount of right to the nearest 0.01 af, and (3) the period of the lease, if applicable. Moreover, all leases must be made on an administrative year basis and must be executed by the Parties and received by Watermaster no later than one month and 15 days following the end of the AY in which the lease is effective.

Table 11 shows permanent transfers of APA and carryover. There were six permanent transfers of APAs totaling 117.00 af and three one-year carryover transfers totaling 33.34 af.

The permanent transfer of water rights must be documented accordingly. For example, when land is sold on which a water right has been developed, the Watermaster must receive a copy of the transfer document if the water right is also transferred. Water rights do not automatically pass to the new landowner when land is sold, unless the transfer document specifies that the water right was transferred with the land. For the proper accounting of the water right, the transfer document must specify (1) the type of right (i.e., APA, one-year carryover, drought carryover, or stored water) and (2) the exact amount of water right(s) transferred. Watermaster provides a template for a Deed of Water Rights -Permanent Transfer transaction on its website to ensure the information provided is sufficient.

For the 2023-2024 AY, there were 151 Parties to the Judgment (individuals or entities that have a water right, privilege or obligation to the Judgment) and 120 Water Rights Holders. There was a decrease of two water right holders compared to the prior AY due to water right holders transferring its APA to an existing water rights holder. Appendix B shows the succession of each party's APA, and Appendix C lists current Parties to the Judgment and Water Rights Holders, including non-parties that own water rights.

H. Exchange Pool

The Judgment authorizes an Exchange Pool to provide additional water rights to Parties without sufficient water. If a Party's estimated water requirement for the following AY exceeds its total available water supply, that Party may purchase additional water from the Exchange Pool. Any Party wishing to purchase water from the Exchange Pool must file a request with the Watermaster before April 1. If no requests are received by April 1, the Exchange Pool will not operate in the following AY, and Watermaster will not process Exchange Pool forms. There were no requests for Exchange Pool water during the 2023-2024 AY (Table 12).

I. Status of Extraction Wells

In 2023-2024 AY, there were 256 wells with reported extractions, which is a decrease of seven wells from the prior AY and corresponds with the decrease in production. There were three new extraction wells reported completed (Table 13) and one well reported destroyed (Table 14). The location of the wells and their relative amounts pumped are shown in Figure 1.

J. Meter Testing Program

Accurate measurement of groundwater extractions is essential for the successful management of groundwater in the Basin. Therefore, Watermaster requires an operative water meter to be installed at each extraction well. It is the responsibility of each Party to ensure that its meter and testing facilities are installed properly and are maintained in good working condition. It is the goal of Watermaster to test the water meter at each active extraction well at least once every two years or when a Party requests a meter calibration. Watermaster tests meters by volumetric or pitot tube comparisons. Watermaster notifies a Party that it must repair or replace its meter when the meter registers beyond five percent accuracy. The Watermaster calculates the monthly water production for each well using the meter readings and Unit of Measure Code reported for the well that month. If the registration accuracy of the meter deviates by as much as five percent, the calculated well production could be subject to revision.

The meter testing program is managed by the Water Rights Panel. During the 2023-2024 AY, the DWR visited 45 Parties and performed 180 tests. Tests showed that zero meters were inconclusive, and one meter failed, which means the meters were either more than five percent fast or slow. The Watermaster Administrative Body notified those pumpers that they must schedule repair and retesting of failed meters in a timely manner.

This page intentionally left blank

Water Supply

A. Precipitation

Precipitation over the Basin has relatively minimal direct influence on the replenishment of the groundwater in the Basin. This is a result of the low soil permeability that characterizes the primary water-producing aquifers throughout much of the Basin and largely impermeable surfaces (i.e., pavement and buildings) covering most of the forebay areas. However, during the years of higher rainfall, increased runoff in the upstream areas of the Basin can result in increased replenishment to the Basin and decreased groundwater demand by the water users, which in turn can result in lower rates of groundwater extraction from the Basin.

During the 2023-2024 AY, the following amounts of precipitation were measured at five precipitation stations located throughout the Central Basin region:

- 20.78 inches at Los Angeles-RD241 (formerly 96th and Central)
- 24.44 inches at Montana Ranch
- 25.19 inches at University of Southern California
- 21.96 inches at La Mirada Station
- 24.08 inches at Imperial Yard

Figure 3 shows the locations of these precipitation stations, and Figure 4 shows the monthly precipitation average measured at the stations. Based on the total rainfall measured at the stations, the mean precipitation over the Central Basin was 23.29 inches, which is 187% of the long-term mean of 12.44 inches. The mean precipitation for 2023-2024 AY decreased by 2.26 inches compared to the prior AY.

B. Groundwater Recharge

Natural replenishment of the groundwater in the Basin occurs largely from surface flow and underflow through Whittier Narrows from the San Gabriel Valley. As mentioned above, minimal rainfall over the Basin infiltrates into deeper aquifers of the Basin.

Intentional replenishment of groundwater in the Basin is accomplished by capturing and spreading river water at the Rio Hondo and the San Gabriel River Coastal Spreading Grounds in the Montebello Forebay (Figure 3). The sources of this replenishment water include local storm runoff, local dry weather urban runoff, imported water purchased from the Metropolitan Water District of Southern California (MWD), and recycled water purchased from Los Angeles County Sanitation Districts. There was 146,060 af in “local runoff” a decrease of 28,351 af or 16% compared to the previous AY. Table 15 shows the sources and quantities of water spread to replenish the groundwater for the 2022-2023 AY and 2023-2024 AY. Specifically, WRD purchased zero imported water for spreading, which is the fifth consecutive year that no imported water is

purchased. In addition, WRD purchased 44,477 af of recycled water for spreading, which is a 96 af or 0.2% decrease from the previous AY. The decrease in recycled water recharge is directly related to the record rainfall and the prioritization of stormwater conservation at the spreading grounds by Los Angeles County Public Works.

C. In-Lieu Replenishment

During the 1965-1966 water year, WRD, in cooperation with the MWD, began an in-lieu replenishment program, where discounted imported water was offered seasonally due to availability. WRD has contracted with producers having access to supplemental imported water that could be used in lieu of extracting groundwater from the Basin to reduce overall pumping impacts. During the 2023-2024 AY WRD offered the program to the City of Long Beach to promote groundwater replenishment. In 2023-2024 AY the City of Long Beach retired 2,397.67 af of pumping rights and took 2,397.67 af of imported water instead under this program (Table 16). The use of supplemental water in-lieu of pumping groundwater counts as water pumped under the Judgment.

D. Imported Water

Water is imported from Northern California via the State Water Project and the Colorado River and is made available to water users by MWD through its member agencies: Central Basin Municipal Water District (CBMWD) and the Cities of Compton, Long Beach, and City of Los Angeles Department of Water & Power (LADWP). LADWP also imports water from the Owens River-Mono Basin. Furthermore, California Domestic Water Company, San Gabriel Valley Water Company, Suburban Water Systems, and the City of Whittier import groundwater from the San Gabriel Valley groundwater basin, which lies to the northeast and upstream of the Basin. In the 2023-2024 AY, a total of 99,902 af of water was imported, for potable use, to the area overlying the Central Basin. Table 17 lists imported water use by source of water, Party, and quantity, not including WRD replenishment water.

E. Recycled Water

Table 18 shows that 13,399 af of recycled water was used in the area overlying the Basin during the 2023-2024 AY, not including WRD replenishment water. This was a decrease of 848 af from the previous AY.

F. Total Water Use

Figure 5 shows 268,882 af of total water use in the Basin during the 2023-2024 AY, including extracted groundwater, imported water, and recycled water for direct use.

G. Exported Water

In the 2023-2024 AY, the California-American Water Company exported 1,949.71 acre-feet of groundwater from the Basin to its service area that overlies a portion of the West Coast Basin.

H. Increased Extraction in the Basin for Certain Purveyors Serving Overlying Communities

Per Section IV.K of the Judgment, “certain purveyors” are Parties to both the Central Basin Third Amended Judgment and the West Coast Basin Judgment and serve communities overlying both the Central and West Coast Basins. These purveyors include the City of Los Angeles, Golden State Water Company, and California Water Service Company and are allowed to increase their extraction in the Central Basin beyond their APA. The increased extraction, which is limited to 5,000 af per AY, is counted against their adjudicated right (AR) in the West Coast Basin.

There were no increased extractions in 2023-24 AY.

I. Alamitos Gap Barrier Project

The Los Angeles County Public Works operates a seawater intrusion barrier to protect water supply wells located inland of the Alamitos Gap near the San Gabriel River (i.e. Alamitos Gap Seawater Barrier Project). The barrier lies in the Central Basin and Orange County, which is shown in Figure 3.

The quantity of imported and recycled water injected into the Los Angeles County side of the barrier in 2022-2023 and 2023-2024 AY are summarized in Table 19. There was a 9.8% decrease in imported water use and a 1.3% increase in recycled water use for injection from the previous AY.

J. Groundwater Levels

Figure 3 shows the location of the selected wells that are used to monitor groundwater level elevations in the Basin. Figure 6 shows the water level elevations in key wells located in the Montebello Forebay, Figure 7 shows the water level elevations in wells perforated in Principal Aquifers of the Basin, and Figure 8 shows the water level elevations in one well located in the Los Angeles Forebay. WRD’s annual Engineering Survey and Report and Regional Groundwater Monitoring Report provide more information on groundwater levels. These reports are available on WRD’s website.

Watermaster Costs and Budget

To fund Watermaster activities, both the Administrative Body and the Water Rights Panel have annual assessments that are levied on water rights holders under the terms of the Judgment.

The Administrative Body assessment applies to the rights holders that have extracted from the Central Basin within the current or past two administrative years (active groundwater producers). The assessment is a flat fee of twenty dollars (\$20) for each active rights holder. In addition, a proportion of the remaining Administrative Body budget is based on the APA of the active rights holder. For 2023-2024 AY, the Watermaster budget for the Administrative Body was \$258,089. This was a 2.7% increase from the prior AY.

Since 2013, the Administrative Body has implemented various tools to improve parties' access to their water rights information, including the development of the distinctive online water rights calculator (rights.wrd.org), which provides parties with real-time information regarding their water rights, established templates for leases, sales, storage and augmentation project applications, and customized water rights accounting support for each party. Furthermore, as required by the Judgment the budget increase was approved by the Water Rights Panel.

Separately, the Water Rights Panel assessment is charged to all water rights holders, not just active rights holders, and it is based on their APA. The Watermaster budget for the Water Rights Panel was \$32,605, this was a 50% decrease from the prior AY. The decrease is attributed to the Water Rights Panel reducing their assessment from \$0.30 to \$0.15 per af.

The overall Watermaster budget was \$290,695, which is 8% or \$25,806 decrease compared to the prior AY. Table 20 lists the budget summary for the 2023-2024 AY.

¹ APA - Allowed Pumping Allocation

² Net Carryover = Drought Carryover + One-year Carryover from the previous year (2022-2023 AY) less the amount of carryover conversion for the current year (2023-2024 AY).

See Table 1b for Drought Carryover totals.

See Table 3 for carryover conversion (water put into storage) per party for 2023-2024 AY.

Net carryover 2022-2023 AY will be negative due to over-extractions in prior years or from carryover conversion to storage of current administrative year carryover: Lakewood, City of; Long Beach, City of; South Gate, City of.

³ See Table 10 for information concerning leases. Lease with flex include carryover provisions.

⁴ Storage includes all storage carryover conversions for 2023-2024 AY. See Table 2 for a summary of all Storage Accounting per party for 2023-2024 AY.

⁵ Total Rights = Allowed Pumping Allocation + Net Carryover + Leases + Storage + Increased Extractions but does not equal the Annual Extraction Limit (see page 5, section D).

⁶ Production for 2023-2024 AY, does not include storage production.

⁷ Storage Production includes all withdrawals from a Party's Individual Storage Accounts and Community Storage Accounts, which totaled 26,466.84 af for 2023-2024 AY. See Table 4 for storage withdrawal amounts per party.

⁸ Total Production = Assessed Production + Storage Production.

⁹ Balance = Total Rights - Total Production

¹⁰ Completed carryover conversion into storage. 2023-2024 AY net carryover and current administrative year carryover:

One-year Carryover Converted: Cerritos, City of: 1,040.91 AF; Downey, City of: 2,000.00 AF; Lakewood, City of: 1,443.63 AF;

Long Beach, City of: 6,538.40 AF; San Gabriel Valley Water Company: 526.01 AF; South Gate, City of: 2,235.35 AF

Current-year Carryover Converted: Lakewood, City of: 3,732.00 AF; City of: Long Beach, City of: 13,616.03 AF, South Gate, City of: 5,264.65

¹¹ In-Lieu: The use of supplemental water in-lieu of pumping groundwater counts as water pumped under the Judgment. In 2023-2024 AY the City of Long Beach retired 2,397.67 af of pumping rights and took 2,397.67 af of imported water instead under this program (Table 16).

¹² Carryover Correction Agreements (2022-2023 AY to 2026-2027 AY): Downey, City of: 670.00 AF; Lakewood, City of: 794.34 AF; Long Beach, City of: 179.90 AF

¹³ Negative One-Year Carryover will be deducted from the subsequent year's APA.

Table 7 - Over-extractions

Party	APA	Carryover and/or Stored Water	Maximum Allowable Extraction ¹	Total Rights ²	Amount Pumped	Over-extraction ³	Violation of Judgement?
California, State of (Cal Trans) ⁴	50.00	No	0.00	-24,358.91	11.95	-24,370.86	Yes
Lakewood, City of ⁵	9,432.00	Yes	5,224.80	5,175.63	6,387.12	-1,211.49	Yes
Newark Group, The	157.00	No	184.87	154.06	156.72	-2.66	No
Total:						-25,585.01	

Table 8 - Extractions by Non-Parties

Non-Party	Amount Pumped (acre-feet)
No extractions by non-parties in the 2023-2024 AY.	

¹ Maximum Allowable Extraction: If the Party has carryover or stored water, they have a maximum yearly extraction of 140% of APA +/- leases and not be in violation of the Judgment if they do not have carryover and/or stored water, they are allowed to over-extract 20% of APA +/- leases or 20 af, whichever is greater.

² Total Rights=APA + one-year carryover+ leases (In accordance with the maximum allowable extraction provision, stored water is not counted under total rights.)

³ Over-extraction= Total Rights - Amount Pumped

⁴ Includes Cal Tran's prior year's over-extractions for dewatering under the 105 Freeway.

⁵City of Lakewood reports that over-extraction shown was inadvertent related to a misunderstanding of its total production rights compared to its total available rights for the administrative year. The provision has been clarified with the City.

Table 9 - Non-Consumptive Water Use Permits

Entity	WRD Res. No.	Description	2023-2024 Extraction
Boeing Company (Assigned NCWUP by City of Long Beach)	22-1178	Allowed to extract 242 acre-feet of water per year for the period from December 1, 2022 - November 30, 2027	128.89
Boeing Company (Assigned NCWUP by City of Compton)	22-1179	Allowed to extract 145 acre-feet of water per year for the period from July 1, 2022 - June 30, 2027.	72.81
Defense Logistics Agency (Assigned NCWUP by City of Norwalk)	19-1098	Allowed to extract 14 acre-feet of water per year for the period from February 3, 2019 - February 2, 2024. WRD is processing a renewal NCWUP application.	4.17
Demunno/Kerdoon	22-1180	Allowed to extract 25 acre-feet of water per year for the period from July 1, 2022 - June 30, 2027.	2.78
Omega OU1/OU3 LLC	23-1202	Allowed to extract 43 acre-feet of water per year for the period from October 1, 2022 - September 30, 2027	7.02
Santa Fe Pacific Pipeline/Kinder Morgan (Assigned NCWUP by City of Norwalk)	19-1105	Allowed to extract 9 acre-feet of water per year for the period from February 3, 2019 - February 2, 2024. Extractions are complete.	0.00
Water Replenishment District (Assigned NCWUP by City of Vernon for perchlorate remediation)	22-1170	Allowed to extract 200 acre-feet of water per year for the period from February 1, 2022 - January 31, 2042	86.11
Total			301.78
