In partnership with cities and nonprofits across WRD's 43-city service area, the Eco Gardener program offers free, engaging workshops that teach residents how to save water and create climate-friendly landscapes.

WATERSHED WISE LANDSCAPING

Learn how to work with nature to catch rainwater and make the most of your garden using simple, low-resource techniques.

EDIBLE GARDENING

Whether you're growing in pots, raised beds, or just starting your garden, this workshop will help prepare your herbs, vegetables, and fruits for a bountiful harvest!

DROUGHT-TOLERANT GARDENS

An introduction to California native plants and learn how to create a drought-tolerant planting plan for your garden.

LANDSCAPING ON A BUDGET

Learn how to make the best choices and save money when switching from a lawn to a watershed-wise landscape.

SMALL SPACE GARDENING

Even with limited outdoor space, discover the many opportunities to create a beautiful and water efficient garden.

RAINWATER CAPTURE

Learn how effective rainwater capture isn't just about the amount of rainfall, but about maximizing how much your landscape can retain and utilize.
